

ONLINE PG AFFORDABILITY

Affordability, built into checkout.

Pay4 lets customers split online purchases into 4 simple payments using eligible credit cards, while merchants get paid upfront.

Credit cards only

Merchant paid upfront

Always-on for enabled merchants

No Pine Labs underwriting

Pay ₹10,099 today, then ₹10,000/month for 3 months.

PAY TODAY

₹10,099

₹10,000 first payment + ₹99 bank processing fee

LATER

₹10,000/month × 3

Collected by your bank

ACCEPTED CREDIT CARD ISSUERS

WHAT IS PAY4?

Pay4 is a standalone online checkout payment mode. It is embedded directly into Pine Labs Online PG, uses eligible credit cards from participating issuers, and applies at order level rather than SKU or brand level.

01

Customer

Pays ₹10,099 today, then ₹10,000/month for 3 months using an eligible credit card.

Pay4 by Pine Labs

Credit-card-funded affordability for online checkout.

From “not now” to “paid now”.

Customers often abandon not because they do not want the product, but because the full upfront amount feels too high.

BEFORE

Pay ₹40,000 today

AFTER

Pay ₹10,099 today + ₹10,000/month × 3

WHY CUSTOMERS CHOOSE PAY4

Smaller upfront payment

Turns a ₹40,000 decision into ₹10,099 today, then ₹10,000/month for 3 months.

Simple structure

No tenure maze. One clear first payment followed by 3 monthly bank collections.

Credit-card funded

Customers use eligible credit cards from participating issuers.

Transparent checkout

Today's amount, bank processing fee and future monthly schedule are shown before authentication.

WHY MERCHANTS ACTIVATE PAY4

Higher conversion

Reduce checkout hesitation by lowering the upfront payment burden.

Higher AOV

Help customers upgrade to higher-value carts when payment is split.

Lower discount dependency

Use affordability instead of always relying on coupons.

Lower commercial complexity

A checkout journey built for affordability.

Pay4 appears as a standalone online payment mode, then moves customers through a familiar card-funded authentication flow.

01

Customer reaches checkout

Pay4 appears alongside UPI, Cards, Net Banking and Wallets.

02

Customer selects Pay4

A ₹40,000 purchase is reframed as ₹10,099 today, then ₹10,000/month for 3 months.

03

Customer chooses card

Saved eligible card or new eligible credit card inside Pay4.

04

Customer authenticates

Standard card authentication with the issuer bank.

05

Merchant gets paid

Order is paid for the full value; bank manages future payments.

Pay ₹10,099 today, then ₹10,000/month for 3 months.

Credit cards only

Order-level financing

NEW

PAY TODAY

₹10,099

₹10,000 first payment + ₹99 bank processing fee

LATER

₹10,000/month × 3

Collected by your bank

A program platform, not just a checkout button.

Pay4 combines checkout orchestration, issuer programs, pricing, settlement and reconciliation into one operating model.

FOUR-PARTY OPERATING MODEL

Customer

Pays today, then 3 monthly payments using an eligible credit card. Issuer-specific processing fee may apply.

Merchant

Sees one Pay4 charge and receives upfront settlement net of Pay4 commercials.

Issuer Bank

Manages card eligibility, repayment schedule, processing fee and future collections.

Pine Labs

Orchestrates checkout, issuer integration, pricing, settlement and reconciliation.

The merchant sees one Pay4 charge. Pine Labs manages the underlying issuer subvention, acquirer cost and bank program receivable.

ILLUSTRATIVE ₹100 COMMERCIAL FLOW

Color separates customer purchase value, deductions, acquiring-leg inflow, merchant settlement, bank receivable and final margin.

Inflow / value retained
