

ONLINE PG AFFORDABILITY

Affordability, built into checkout.

Pay4 lets customers split online purchases using eligible credit cards, while merchants get paid upfront.

Credit cards only

Merchant paid upfront

Always-on for merchants

WHAT IS PAY4?

Pay4 is a standalone online checkout payment mode embedded into Pine Labs Online PG. It applies at order level and uses eligible credit cards from participating issuers.

Customer

Pays ₹10,099 today, then ₹10,000/month for 3 months.

Merchant

Receives full order value upfront, net of Pay4 commercial charges.

Issuer Bank

Manages eligibility, repayment schedule and future collections.

CUSTOMER + MERCHANT PITCH

From “not now” to “paid now”.

Pay4 reframes checkout affordability without making discounting the only conversion lever.

Before

Pay ₹40,000 today →

After

Pay ₹10,099 today
+ ₹10,000/month × 3

Smaller upfront payment

₹40,000 becomes ₹10,099 today,
then ₹10,000/month for 3 months.

Simple structure

No tenure maze. Clear first payment
plus 3 monthly bank collections.

Credit-card funded

Customers use eligible credit cards
from participating issuers.

Transparent checkout

Today's amount, fee and future
monthly schedule are shown first.

Higher conversion

Reduce checkout hesitation by lowering
the upfront payment burden.

Lower commercial complexity

One Pay4 charge, with issuer economics
handled through the program.

PAY4 VS TRADITIONAL EMI

Traditional EMI

Late discovery · Multiple tenures · Fragmented merchant economics

Pay4

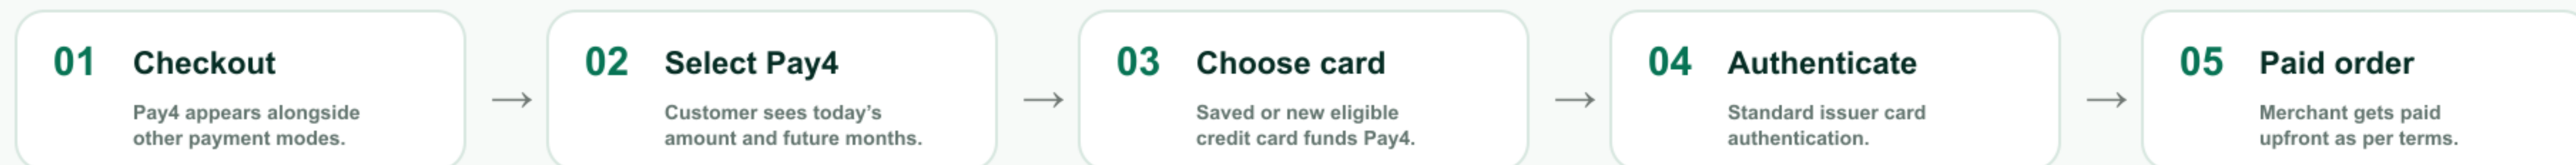

Always-on mode · Today + 3 monthly payments · No Pine Labs underwriting

JOURNEY + INTEGRATION

A checkout journey built for affordability.

Pay4 is visible inside Pine Labs Online PG as a standalone payment mode and remains card-funded behind the scenes.

PAY4 CHECKOUT MODULE

Credit cards only

Pay Today ₹10,099
Later ₹10,000/month × 3
₹10,000 + ₹99 fee

Pay ₹10,099 today, then ₹10,000/month for 3 months.

BUILT FOR MID-TICKET ONLINE COMMERCE

Best suited for categories where customers have purchase intent, but upfront payment creates hesitation.

Furniture

Mattresses

Fashion

Travel

Healthcare

Education

Eyewear

Premium retail

Merchant site/app → Pay4 availability & pricing → Checkout selection → Card authentication → Success callback → Settlement & reporting

COMMERCIALS + OPERATING MODEL

Built as a program platform, not just a checkout button.

The merchant sees one Pay4 charge. Pine Labs manages issuer subvention, acquirer cost and bank program receivable.

Customer

Pays today, then 3 monthly payments; issuer fee may apply.

Merchant

Pays one Pay4 fee and receives upfront settlement.

Issuer Bank

Manages eligibility, repayment and future collections.

Pine Labs

Orchestrates checkout, pricing, settlement and reconciliation.

₹100 ILLUSTRATIVE WATERFALL

Start	₹100 purchase	Customer purchase value
Less	~₹3.25	Subvention / bridge
Equals	₹96.75	Auth amount
Less	~₹1.60	Acquirer / card cost
Add	~₹1.70	Bank program fee receivable
Final	~₹1.05	Illustrative gross margin

KEY RISKS AND MITIGATION

Product	Customer confusion	Clear schedule and fee disclosure.
Bank	Rail inconsistency	Bank-wise adapters.
Finance	Settlement mismatch	Dedicated Pay4 ledger.
Support	Refund complexity	Certify refund behavior.

Make affordability the default checkout behavior.
